

BKK-Provita Mobile Quiz application

PROJECT - BKK-Provita

Goals To design a health care quiz application for **BKK Provita**, to create awareness and promote their brand.

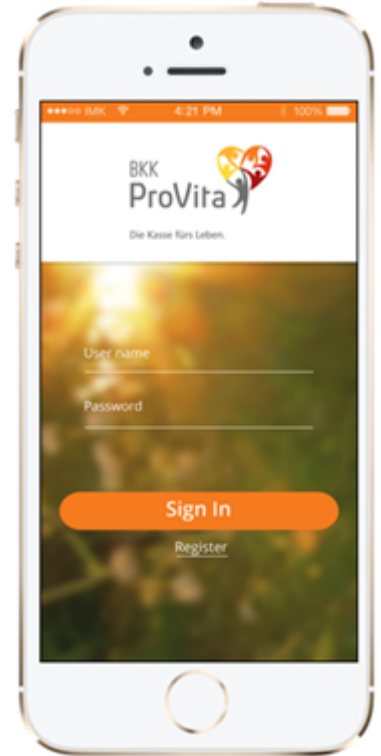

End Users are general public without age and gender restrictions

Overview of the project

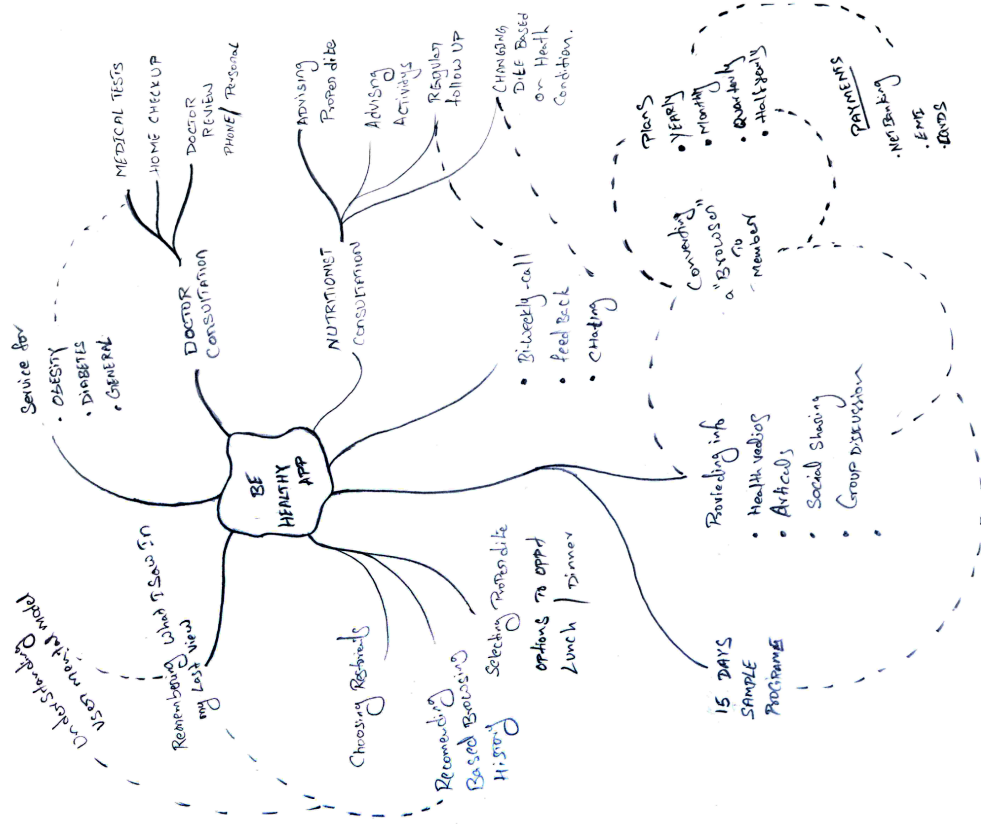

- To design the quiz app in a more user friendly environment, a demographic and geographical research was conducted. This includes observation of the user interviews to have an understanding of their lifestyle and health consciousness.
- Observation of how users utilize the system and theoretical knowledge of design in general.
- Once the information is collected, the designer will analyze and make a systematic flow of the process by creating personas. A prototype will be designed to showcase the multiple scenarios of the users, and tested to see if it meets their requirements.

Methodology and Approach The below section describes the methods and approach followed to design the Quiz App

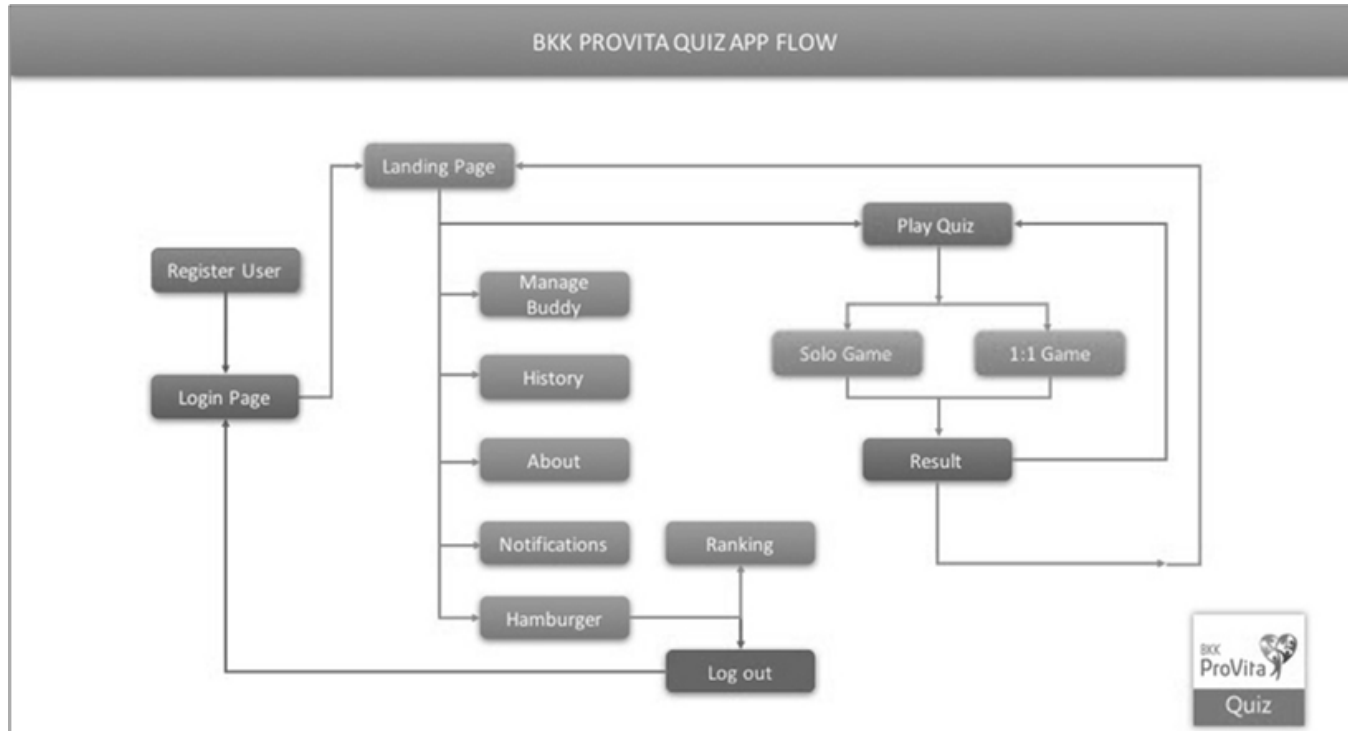

- Discover
- Story Board
- Sitemap
- Wireframe
- Visual Mockup
- Interactive Prototype

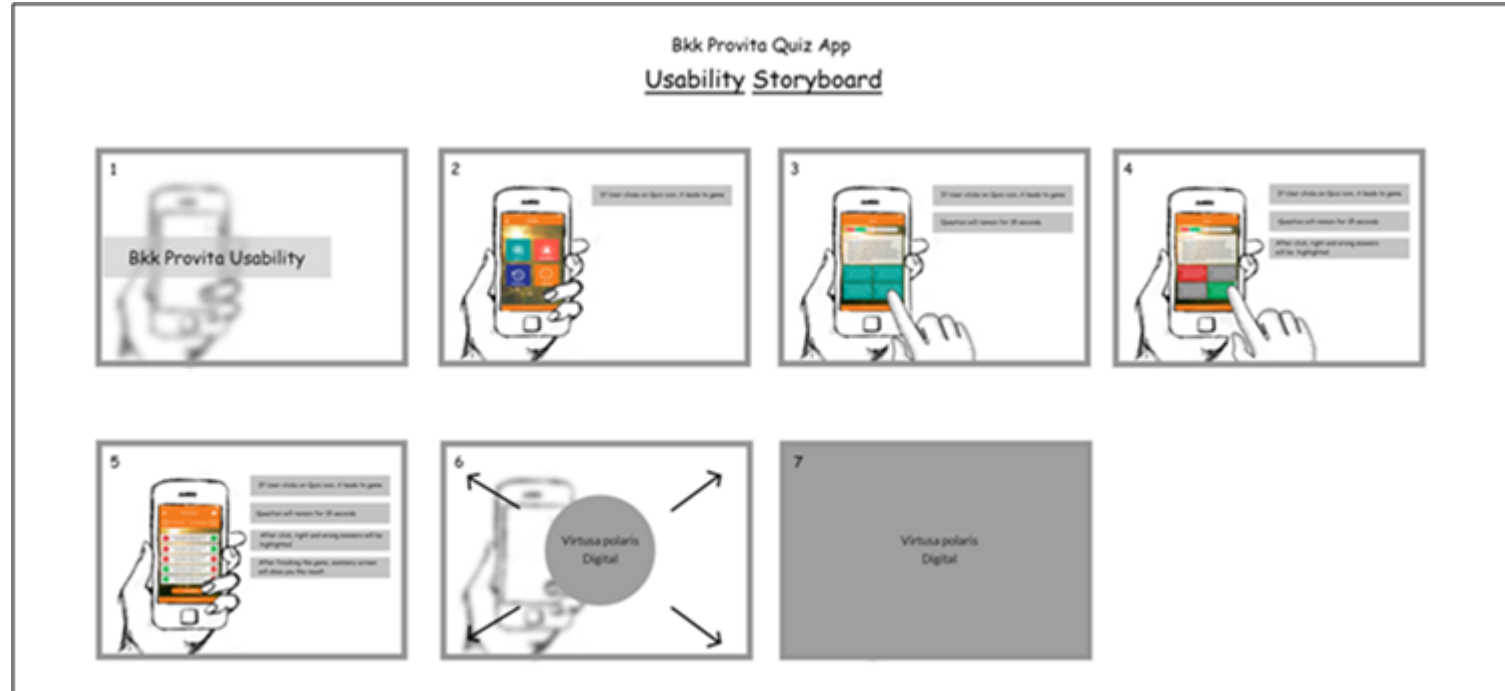

Mind MAP

The below sitemap depicts the flow of workpage and gives insights on the respective internal flow.

The storyboard displays the context, the problem, the user fears / motivations and shows how the problem will be solved. I use tools like Photoshop to quickly create these storyboards.

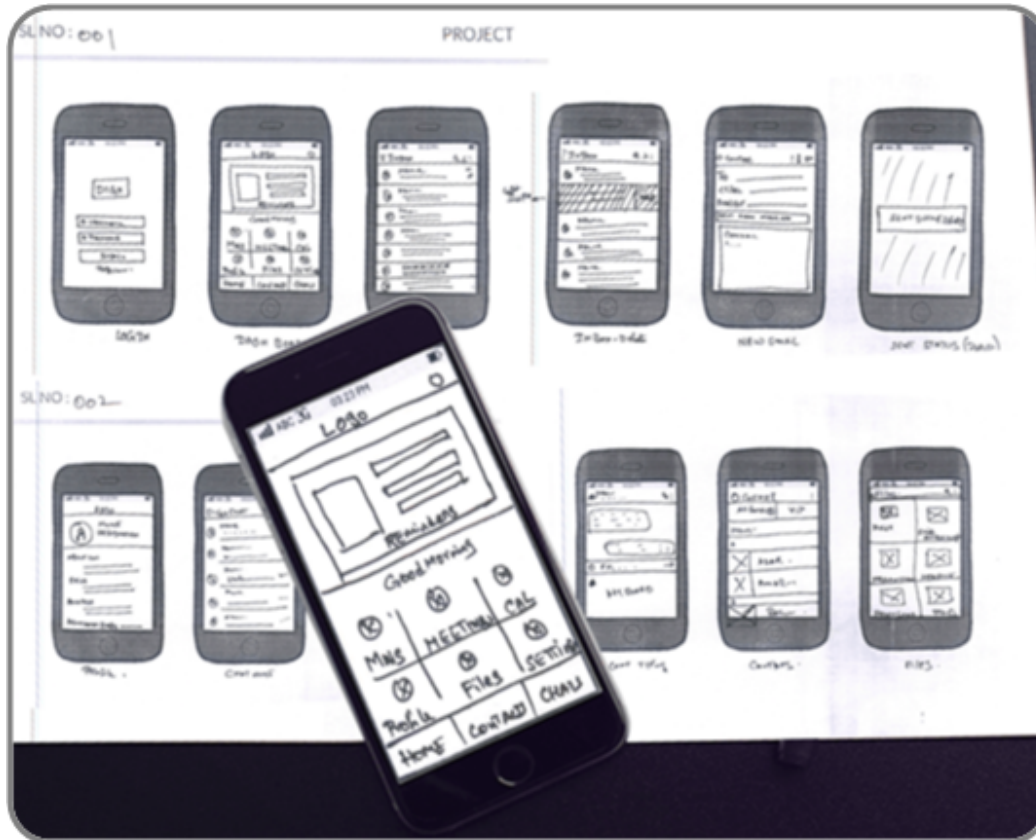

User stories and functionality

The storyboard displays the context, the problem, the user fears / motivations and shows how the problem will be solved. I use tools like Photoshop to quickly create these storyboards.

G11 Home Page								
A	B	C	D	E	F	G	H	
SL.No.	Feature	User Story	Description	Acceptance Criteria	Business Rules	Dependency/Preceding page	Screen Elements	
1	User Login	Login Page	As a BKK Provita user I want to login into the app So that I can access other features of the app	Given That I am a registered user of BKK Provita and have not logged in into the app when I open the app the Username and Password fields are displayed on the screen and I have provided a valid username and I have provided the valid matching password, when I click on forward button then I should be able to login and taken to landing /home page	1. Only registration complete user can log-in 2. Admin can login with admin user id and password 3. Different log-ins on same device is allowed provided previous user is logged out 4. Same user can login on another device provided he has logged out of previous device 5. Forgotten Password can't be reset	NA	User name label Password label Username text input field Password input field Forward Button Signup/Register link	Forward Home/I Sign Up registra
2	User Login	Register User	As a new BKK Provita user I want to register myself on the app So that I can log in into the Provita app	Given that I have downloaded the BKK Provita app and I have opened the app when I click on the Sign up link on the log in page I am taken to the registration page and registration input fields are displayed on the screen and I have chosen a unique username and password, and I click on "Submit" button then my registration is complete	1. User name chosen should be unique 2. User name should contain atleast 6 characters 3. Password can be minimum of 6 characters 4. Password must include atleast one alphabet and one digit 5. Once registration is complete user is automatically logged in to the app	Login Page	Back Button Choose Username label Choose Password label Re-type chosen password label Choose Username input text field Choose Password input field Re-type chosen password input field Submit Button	Back Bl page)
